

DYNAMIC

SILVER SERVICE

OPENING DOORS FOR BUSINESS

The Dynamic Silver Service team are dedicated to providing responsive, fast and effective service. Our clients depend on us to have their shop fronts and entries opening for business and closing for security.

VISIONLINE - SECURACLEAR®

ROLLER DOORS AND SHUTTERS

Visionline's interlinked polycarbonate slat curtain design allows visibility with maximum protection.

Visionline® polycarbonate and aluminium roller shutters provide a stylish and secure closure. Visionline is the perfect solution for:

- **Commercial shop fronts**
- **Shopping centres**
- **Shop windows**
- **Retail outlets**
- **Serveries**
- **Counters**
- **Bars**
- **Hotel kitchens**
- **Kiosks**
- **Cafés**
- **Restaurant roller shutter needs**

Visionline's roller shutter curtain design is made up of alternating **durable polycarbonate slats**, interlinked with heavy duty extruded **aluminium connecting rods**. This feature provides a robust barrier with **protection from intruders, dust and vermin**, while **permitting visibility and light transmission** through the transparent curtain panels.

CONTROLS

MANUAL OPERATION

Visionline roller shutters are fitted with an assist spring within the drum which is the lifting mechanism that allows the roller shutter curtain to be physically raised and lowered by hand. The assist spring balances the weight of the roller shutter curtain and makes operation easier and safer.

Our specially designed spring balanced drum is suitable for MANUAL OPERATION shutters up to **3400mm (w) x 3200mm (h)** (or 10 metres per square). These manual hand operated shutters are normally fitted with mid-rail or bottom rail locking devices to keep the shutter secure.

A Dynamic Service Pull Pole is supplied with every manual shutter, to reach the shutter to aid in pulling down in the up position.

VISIONLINE MICRO SLAT ROLLER SHUTTER

MOTORISED OPERATION

The most convenient way to open and close the Visionline roller shutter is to opt for the **240V electric motor option**. A range of electric central or tubular motors and accessories are available from Dynamic Silver Service for roller shutters.

ROLLER SHUTTER ACCESSORIES:

- 100nm or 140nm central inbuilt motors, which allows for easy installation and smaller bulkhead requirements.
- Key switch control (can be keyed alike).
- Emergency push button control.
- Back-up power for 240V mains powered electric roller shutters via an UPS (Uninterruptible Power Supply), so in the event of a power outage you can still open or close your roller shutters.
- Manual override mechanisms as a safeguard to allow manual opening and closing of your roller shutters in case of a power outage.
- Remote control devices.

Electric central and tubular motors for Visionline roller shutters are suitable for all roller shutter sizes up to 6500mm (w) x 3500mm (h) or 23 metres per square.

Dynamic Silver Service is continually researching and developing products and reserves the right to change specifications without notice.
